

CodeRVA Regional High School is a regional public high school serving students from thirteen school divisions in the greater Richmond, Virginia area.

CodeRVA's goals:

- Redesign the high school experience to better meet the needs of today's students;
- Address racial, economic, and gender inequities in STEM-related education; and
- Increase the pool of potential employees in computer science-related fields for central Virginia.

The school's design builds on next generation school models across the nation that rethink the use of time and space, leverage technology to accelerate learning, personalize learning experiences, and redesign curriculum to align with competency-based progressions.

Focused on computer science, the school will offer the opportunity to complete high school requirements through a combination of blended (online and face-to-face) learning, integrated coursework, and project-based learning. CodeRVA High School students will be provided an opportunity to graduate with a Virginia high school diploma, an associate's degree from J. Sargeant Reynolds Community College, industry certifications, and paid internships in computer science related fields.

Eligibility

Students that apply:

- must be eligible for grade 9 in 2018-2019;
- must be a resident of a participating school division;
- should have an interest in and passion for computer science; and
- should be interested in developing their self-management skills and independence in learning, critical thinking, and problem solving.
